PROFESSIONAL SUMMARY

Motivated and detail-oriented Information Technology student at Rwanda Polytechnic, with demonstrated practical skills in web development, database management, and project leadership. Experienced in delivering real-world solutions across agriculture technology and education systems. Passionate about leveraging ICT to create impactful, community-centred digital products across Africa. Seeking an internship or entry-level IT role to contribute to high-impact teams and accelerate professional growth.

EDUCATION

Advanced Diploma in Information Technology

August 2023 to September 2027

Rwanda Polytechnic (RP NGOMA College)

- Core modules: Web Development, Database Management, Computer Networks, System Analysis and Design
- Practical projects encompassing full-stack web applications and collaborative IT system deployments
- Active member of technology student initiatives focused on community-oriented software solutions

PROJECTS AND EXPERIENCE

Project Manager

2024

SmartVeg Rwanda — Smart Agriculture Technology Initiative • Ngoma District, Rwanda

- Led a cross-functional student team of hardware engineers, software developers, and agronomy consultants to design and deploy an AI-assisted smart agriculture platform
- Conducted field research with over 15 farmers and 3 agronomists across Ngoma District to identify critical pain points around soil monitoring and irrigation management
- Coordinated three full Agile development iterations, progressing from basic IoT soil sensors through weather data integration to a complete web dashboard and SMS alert system
- Delivered an estimated 30 percent reduction in water usage through sensor-driven irrigation recommendations, attracting interest from government agricultural partners

Lead Developer

2024

School Information and Feedback System (SIFS) — Academic Project • Rwanda

- Designed and developed a complete five-page school management web application featuring secure registration, role-based login (student and administrator), and an anonymous student feedback pipeline
- Conducted a needs analysis with 20 students and 5 staff members to define system requirements before writing a single line of code
- Built the full-stack solution using HTML, CSS, Java, and MySQL via XAMPP; tested with five student volunteers achieving 100 percent successful registration completion
- Received an A grade for academic project excellence in system design and implementation

Frontend Developer

2024

ICT Tools Shop — E-Commerce Web Project • Rwanda

- Benchmarked four regional ICT retail websites to inform a user-centred product listing design for local hardware and software vendors
- Built a fully responsive four-page e-commerce site using Bootstrap 5, featuring a hero banner, category navigation, product cards with hover effects, and WhatsApp integration
- Achieved 100 percent mobile responsiveness across all target screen sizes, validated through multi-device testing throughout the build cycle
- Received a B+ peer review rating for clean design, performance, and usability

SKILLS

Development	HTML5 • CSS3 • JavaScript • Java • Bootstrap • React (learning)
Database	MySQL • XAMPP • Database Design • SQL Query Writing
Tools	Git • GitHub • VSCode • LibreOffice • Figma (basic)
Soft Skills	Project Management • Leadership • Team Collaboration • Problem Solving • Adaptability • Communication
Languages	Kinyarwanda (native) • English (professional) • French (intermediate)
